

There are some critical or significant requirements for which any non-compliance (in accordance with the criteria set forth below) **would involve the automatic assignment of 0 score** regardless of the possible compliance with the rest of the requirements of the subarea.

REQUIREMENT

TOLERANCE OR ACCEPTANCE LIMIT

	(5.1.2) (5.1.3) Absence of drinking water or food supply		Presence of 1 or more pigpens that do not comply
	(5.3.2.9) Presence of tied up females		Presence of 1 or more animals in the farm
	(5.3.3.) Pen density		Presence of 1 or more pigpens that do not comply
	(5.3.7) Pavements and slats		Presence of 1 or more pigpens that do not comply
	(5.1.1) (5.3.5) (5.4.1) (5.6.2.9) All those requirements relating to body condition, breathing problems, wounds, injuries, prolapses, deficiencies in tail docking, lameness, ...		Exceeding the criterion of maximum % established in each of the applicable sections.
	(5.4. 5) Presence of animals that are not viable and/or exhibit obvious signs of suffering without application of the stamping out protocol		Presence of 1 or more animals in the farm
	(5.5.2.2) Absence of enrichment material or deficient material		Presence of 1 or more pigpens on the farm
	(5.2.15) The products used (biocides) are authorised products.		Presence of 1 or more unauthorised products
	(5.4.1.8) Only medicinal products authorised by the competent authorities of the EU will be allowed for use		Presence of 1 or more unauthorised medicines
	(5.4.1.15) Only antibiotics for therapeutic purposes, not prophylactic, are allowed for use.		Evidence of the use of antibiotics for non-therapeutic but rather prophylactic purposes
	(5.5.2.4) Minimum mixture of breeding pigs		Evidence of a mixture of breeding pigs after 7 days post-weaning
	(5.5.2.5) Avoid violent fighting between animals		Exceeding the criterion of % established maximum
	(5.6.2) Absence of pain through handling		Evidence of non-compliance of a requirement of the subarea
	(5.6.0.2) Presence of trained and professionally competent staff in charge of caring for the animals.		Absence of trained and professionally competent staff and/or lack of new personnel supervision by a manager
